

Understanding the World

We will be: learning about how we change as we grow, sharing our holiday news and talking about our families and friends. We will learn about healthy food choices and experiment to see which fruit and vegetables float or sink. We will use the technology available in class to support our own learning.

Mathematics

We will be counting small groups of objects, reciting number names in order, comparing quantities and representing numbers using our fingers. We will order objects by size, look for shapes in the environment and use time vocabulary.

Physical Development

As we become familiar with our new setting, we will think about ways to stay healthy and safe. Outside we will complete superhero obstacle courses and use lots of different equipment. Indoors we will develop our fine motor skills and mark-make using a variety of writing equipment.

Our Creative Learning Journey theme is 'Are they birds or are they planes? No, they're Super Learners' – the children will learn about Growth Mindset and talk about their aspirations.

Expressive Arts and Design

Our imaginations will allow us to role-play being superheroes. We will sing new songs, play instruments and create movement in response to music. We will design capes and make masks.

Literacy

There will be opportunities for us to share our favourite stories, rhymes and songs. The children will be encouraged to mark-make using a variety of writing equipment.

Communication and Language

The children will listen to lots of stories, follow instructions straight away and express themselves using simple sentences and non-verbal gestures.

I LEARN

What's Your Superpower?

Personal, Social and Emotional Development

This term we will make lots of new friends and build relationships with staff members. We will learn to follow the 3 Golden Reminders and develop a Growth Mindset.

**GROW
YOUR BRAIN**

**CALLING ALL
SUPERHEROES!**
