

Our new Creative Learning Journey is Super Sparky Science

Literacy

We will be reading a variety of books about Science. We will write labels, captions and attempt to write short sentences using our phonic knowledge. We will try to communicate meaning by using some clearly identifiable letters.

Physical Development

We will be learning about healthy eating and finding out how exercise is good for our bodies. We will be using tools safely when experimenting.

Expressive Arts and Design

We will be making instruments and exploring the different sounds they make. We will learn about colour mixing. We will investigate the textures of different materials. Our role-play corner will be a Science laboratory.

Maths

We will be solving mathematical problems; learning about 2D and 3D shapes; using everyday language related to time and position and adding and subtracting with numbers up to 20.

Personal and Social Development

We will be working on scientific activities with a partner. We will be encouraged to choose resources we need for activities. We will be sharing our ideas with the class.

Understanding the World

We will be learning about Biology, Physics and Chemistry. We will find out facts about real scientists and discover what jobs they do. We will do lots of exciting science experiments.

Communication and Language

We will be developing our listening skills and asking questions. We will be remembering to speak clearly linking statements to a main theme.
