

*Our Creative Learning Journey
theme will be 'The Journey of
the Dragon'*

MATHEMATICS

We will have opportunities to get better at counting objects reliably, recognising numbers and singing number songs. We will compare the size of dragons, measure wing spans and tails. We will make dragon pictures using 2D shapes and build 3D dragons

PHYSICAL DEVELOPMENT

We will learn how to move like a dragon to Chinese music. We will develop our gross and fine motor skills. We will get better at using scissors and small tools when creating artwork and develop a good pencil grip. We will be encouraged to look after our own personal hygiene.

EXPRESSIVE ARTS AND DESIGN

We will be designing and making a dragon trap, looking at famous dragon art work and creating our own, using our imagination when role-playing and listening to and learning some dragon songs.

LITERACY

We will read dragon stories and poems, make wanted posters, write invitations and make maps for our own dragon trail.

PERSONAL, SOCIAL AND EMOTIONAL DEVELOPMENT

We will be getting used to new routines and settings. We will have opportunities to make new friends and learn about the 3 Golden Reminders. We will care for our dragons and think about what we want to get better at in Reception this year.

UNDERSTANDING THE WORLD

We will find out about dragons, and try to work out what they like to eat, where they live and what noises they make. We will talk about other ways to travel and discuss our own holidays and journeys. We will learn how to use simple ICT to support our learning.

COMMUNICATION AND LANGUAGE

We will be developing our communication skills by asking questions and listening to others. We will listen to stories and sing songs together. We will go to 'Storyland' in our Drama lessons where we will use our imagination when pretending.
